

Download the Installer from <https://news.washeriff.net/spillman/> (it is named Spillman63.exe) and run it. Just click next, next and install to install it in default mode. When you are all done click Finish. Then click on the Spillman Icon on the desktop. You will see a screen like below Click the detail button .

Now click the drop down box under "Server" and click on <new>. As shown below:

Change "Configuration Name" to Spillman and server to dixie911.org as shown belo and click OK. Done!
